DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Toshiba (JP 2003-270255).

With respect to Claim 1, Toshiba discloses a torque measuring device comprising:

a laser (#s 2a-2b);

a light transmitting and receiving device for irradiating the laser light (#s 3a-b, 4a-b, 9a-b, the optical fibers and the system to which they are connected);

reflectors (#s 6a-b) on a surface of a rotational body (#5) with a space in the axial direction between the reflectors;

a signal processing device (#s 13 and 14); and

wherein the light transmitting and receiving device comprises:

polarization-maintaining fiber circulators (8a and 8b) for polarizing the laser light (Abstract, the separating means) from the output device (#s 2a-b) and outputting the polarized light (#4a), and for inputting the reflected light through the same light path (#4a), separating the reflected light from the laser light output device (Abstract, wherein 8a and 8b "separate reflected"

Application/Control Number: 10/578,542

Art Unit: 2855

light rays received...from the projected light rays") and outputting the reflected light to the signal processing device (#s 9a-b, 11a-b, 12); and

light irradiation detecting sections (Fig. 2, & #s 7a-b) provided facing the surface region of the rotational body (Fig. 1).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following discloses similar sensing arrangements and components: Kokkelink et al. (US 6,339,661), Kuoda et al. (US 6,460,422), and English Patent Abstract of JP 2003-270225 (accessed from esp@cenet, published September 09, 2003, 1 page).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Punam Patel whose telephone number is (571) 272-6794. The examiner can normally be reached on Monday to Friday 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Lefkowitz can be reached on (571) 272-2180. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
